DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 2. Claims 1 and 5-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kloess et al. (US 6,357,618) in view of Abu-Isa (US 6,395,357).

Kloess teaches a cover having a base wall **26**, a skirt **24**, a fuel tube **22**, and an unnumbered portion extending axially upwardly from the base wall.

Regarding claim 20, the base wall is attached to the fuel tank via a gasket 30.

Although the cover is not explicitly stated to have a blade terminal, since it is a fuel module cover and applicant has stated blade terminals are part of a fuel module cover, the cover of Kloess is considered to have a blade terminal. Kloess does not teach a fuel permeation barrier layer.

Abu-Isa teaches it is known to provide a fuel permeation barrier layer of EVOH to a fuel tank and an associated cover assembly (see figure 2 depicting the barrier layer **34** sandwiched between other layers of the cover).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of a fuel permeation barrier layer to cover any desired area of the cover, and more specifically to the area between the base wall and the raised portion, of the tank cover assembly of Kloess. Doing so would ensure no vapors escape the closed tank.

Regarding claims 9 and 13, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the barrier layer of a thickness of approximately 0.2 mm to 2.0 mm, since would have been a matter of design choice expedient for use with tanks containing fuel.

Application/Control Number: 09/731,464

Response to Arguments

3. Applicant's arguments with respect to claims 1 and 5-20 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

- 4. This Office action is made non-final in view of the new grounds of rejection.
- 5. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.
- 6. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

Γhe U.	I hereby certify that this correspondence for Application Serial No is being facsimiled to S. Patent and Trademark Office via fax number (703) 872-7306 on the date shown below:
	Typed or printed name of person signing this certificate
	Signature
	Date

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robin Hylton whose telephone number is (703) 308-1208. The examiner works a flexible schedule, but can normally be reached on Monday - Friday from 9:00 a.m. to 4:00 p.m. (Eastern time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

Application/Control Number: 09/731,464

supervisor, Lee Young, can be reached on (703) 308-2572.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers should be directed to Technology Center 3700 Customer Service Office at (703) 306-5648.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1148 or may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
